A WORD FROM THE CEO

IAN BARET CEO, World Time Attacl

G'day and welcome to the 2024 Yokohama World Time Attack Challenge, our high-speed way of celebrating car culture! Last year we saw the world come Down Under to party, with a stack of lap records broken and legends made. In 2024 we're back to do it all again, faster, louder, and with nothing left on the table..

We've got teams from Japan, America, New Zealand, Finland, and South Korea, all ready to push themselves and their cars to the absolute limit in the pursuit of one perfect lap in Haltech Clubsprint, GCG Open Class, Plazmaman Pro Am Class and EMTRON Pro Class; not to mention the Garrett International Drifting Cup, Turbosmart Flying 500, or the Shannons Stylized Car Show.

The amount of preparation which goes into every vehicle that hits the Sydney Motorsport Park circuit is astounding, and that is before you consider some of these cars are sent literally halfway around the world to be pushed harder than they've ever been driven before. The commitment needed is on another level, so we say thank you to all the competitors, teams and exhibitors for coming out to put on a show.

Speaking of putting on a show, we have a new addition to the schedule with the Full Send Crew. We've put together a team of drivers and cars that test the top of the dial and will be on the limiter and lock stops just to entertain you, and where else would you see a rotary-powered VL Commodore and GT3 McLaren set up for drifting door handle-to-door handle?

We've also got the Hot Wheels Stunt Team ready to fly high and slide wide, and an all-new kids' zone for the younger car enthusiasts who may need to take five minutes away from the intensity on-track. The Turbosmart Flying 500 will also bring plenty of intensity each day, as a stack of cars with well over 1500hp will run Head-to-Head up the main straight!

I have to send a huge thank you to our partners, sponsors, competitors and teams from around the country and around the world, traders, exhibitors, officials, volunteers, my overworked and probably exhausted team and, most of all, the biggest thank you goes to you spectators! You came through the gate to support what is now by far the biggest and best time attack event in the world, bar none! And for that I am incredibly humbled!

Lastly a big thank you to the team at Destination NSW, and the ARDC for helping me keep the Yokohama World Time Attack Challenge right here where it belongs, at what is without question the best circuit for this event in Australia: Sydney Motorsport Park.

Sit back, relax, and enjoy the show as we aim for One Perfect Lap!

WELCOME FROM The NSW Government

World Time Attack Challenge is one of the most exciting and diverse international motor sport events on the track. Featuring tuning teams from around the world, ranging from fully professional race teams to independent tuning shops competing on the same circuit. And there is no better place than Sydney Motorsport Park to watch the stars of these finely tuned cars go lap-for-lap for the crown of World Time Attack Champion.

The NSW Government's investment in permanent lighting at Sydney Motorsport Park has created a unique experience for motorsport fans, offering the thrill of night-time racing along with car shows, driving demos, product exhibitions and other activities throughout the day at one of Western Sydney's showpiece events.

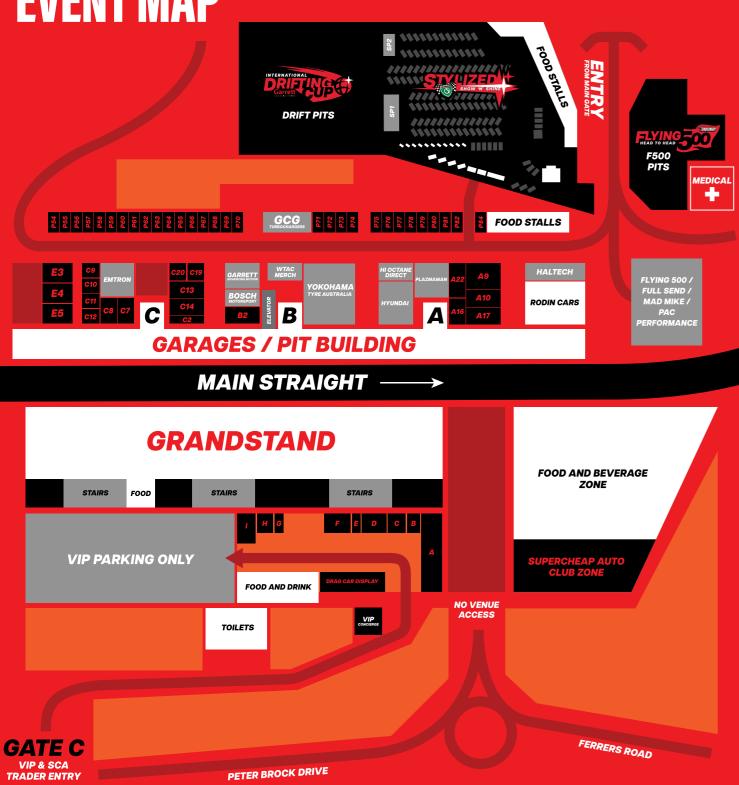

Western Sydney is a hub for major events and unique experiences, with World Time Attack Challenge contributing to its vibrant sporting and cultural events calendar. It also attracts thousands of fans, teams and officials to Western Sydney, who stay in our hotels, visit our attractions and spend locally, supporting hundreds of jobs and turbocharging one of the nation's fastest growing visitor economies.

Enjoy the high-octane action and take some time off the track to discover all the visitor experiences on offer throughout Western Sydney at Sydney.com.

WTAC 2023 TIMES TUMBLE

FROM RACE TO ROAD

The 2023 Yokohama World Time Attack Challenge brought action aplenty with several class records falling on the Sydney Motorsport Park circuit.

Defending champion, the RP968 Porsche, not only won the Emtron Pro class for 2023, but it broke its own lap record on each day. Its fourth outright WTAC win in a row now equals the highest number of outright wins, joining the Tilton Evo as one of WTAC's greatest legends.

RP968's 1:18.8 in the first Emtron Pro class session on Day 1 knocked off the Sydney team's own record of 1:19.277 from 2019. They then came out in the first session of Day 2 to clock a 1:17.860, taking nearly 1.5-seconds off their own lap record.

Tim Slade in the Tanuki S13 Silvia finished second with a 1:20.456, with the Lyfe Motorsport R35 GT-R from America finishing third after repairing a broken transmission on Day 1.

Texan Feras Qartoumy took out Plazmaman Pro Am in 2023, despite having never raced at Sydney Motorport Park before. He still wheeled his epic C6 Corvette to a 1:27.016, half a second ahead of Richard Perini's VR38-powered Ginetta G55 (1:27.527) in second. The Tanuki S13 crashed after losing a wheel on Day 2 but Wayne's 1:27.540 was enough to keep him in third.

Dankter

Tim Slade won the 2023 GCG Open class in the Xtreme GT-R, banking a 1:26.192 to hold off Nathan Morcom in the GAS Evo for the gold.

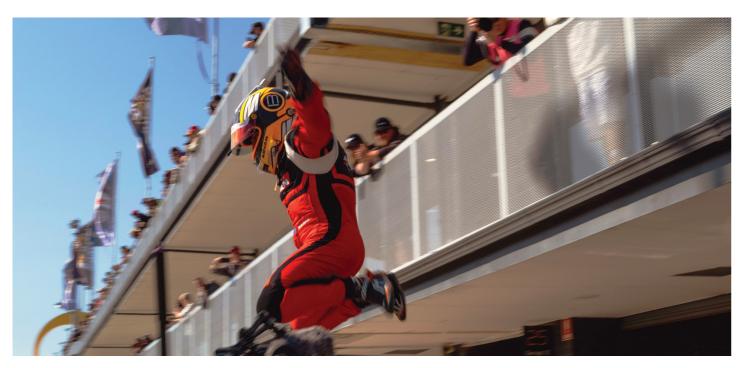

WTAC veteran Benny Tran in the BYP Integra rounded out the podium, running a 1:28.581

Trent Grubel in the DC Jap Subaru broke the lap record twice on his way to winning Haltech Clubsprint in 2023, running a 1:33.493 on Friday, then pulling a 1:32.919 on Day 2 to break the class into a new time bracket! Jimmy Asaad's 1:34.031 in the ESR Evo early on Day One was enough to keep him second in Haltech Clubsprint, while Michael Garland's GotltRex GC8 rocked into third place on Day Two with a 1:34.198. The 2024 Emtron Pro Class has a new challenger in the form of the Sintura S99 from New Zealand's Rodin Cars. Originally designed in 1999 to GT1 endurance racing regulations, it disappeared for years until Rodin Cars founder David Dicker found the cars for sale and brought them to NZ.

Rodin has now fitted a 650hp 4-litre naturally aspirated V10 of their own design, and which revs to over 10,000rpm. As part of the modifications needed to ready the 900kg beast to run in Emtron Pro Class at WTAC, the wheels were also changed to 11-inch-wide items all 'round with Yokohama A005 slicks.

"In all honesty, it's still in testing mode," says Dicker. "It's likely we'll have some challenges pop up at WTAC but our goal is to unveil the reworked Sintura to the world, enjoy the competition, and entertain the crowd." Losh Buchan will drive the Podin at WTAC. The 2023 TCP

Josh Buchan will drive the Rodin at WTAC. The 2023 TCR Champion has a long history with WTAC, having been a camera runner at the 2014 event; his first motorsport event!

2024 EVENT PROGRAM PAGE 4

TSUKUBA'S SECRET Weapon

Having kicked off in the 1980s as a radiator shop, Yashio Factory is today highly-regarded for building bright pink drift rockets packing wild SR20DET power. Instead of coming to run trains, Oka-chan has shipped his second S15 Silvia demo car to Australia, and this one packs a wicked punch on the circuit.

It is a veteran of the Japanese time attack scene, having dipped into the 56-second bracket at the home of time attack: Tsukuba Circuit. But, Oka-chan isn't taking any risks and he's given the retina-bashing coupe a serious birthday ahead of WTAC. He'll have his work cut out for him against experienced hands like Tim Slade in the Xtreme GT-R and Nathan Morcom in the GAS Evo.

One of the absolute crowd favourites at the Yokohama World Time Attack Challenge, Rob Nguyen's Mighty Mouse Honda CRX has been brought out of retirement to one again take on Plazmaman Pro-Am Class. A David versus Goliath story, the small front-drive hatch has won a legion of fans around the world for punching far beyond its weight division.

With a 600hp supercharged K24 Honda its lap of 1:26.276 in 2017 stopped everyone in their tracks, but Rob knows the time attack game doesn't sleep. In preparation for 2024 he's had a fresh engine built with more power, and has reportedly added 40% more aero to the tiny front-driver.

Keep an eye on the session times for Plazmaman Pro-Am to see Mighty Mouse roar once more.

Hirokazu "Arios" Suzuki has shipped his McLaren MP4-12C Down Under for the Garrett International Drift Cup... Wait, what is a modern day supercar doing in a drift competition? Having run a Ferrari 360 in drift competition way back 2013, Ario got his mate and WTAC fan favourite Daigo Saito to help him with his latest crazy idea.

Based off a GT3 competition-spec car, the Mac-Daddy has been put together with some parts top-end motorsport and some parts purpose-built drift car. How will the twin-turbo V8 fare against some brutish 1000hp machinery? Only time will tell.

You'll be able to see the fat Mac run hard in the Garrett International Drift Cup on Friday and Saturday of the 2024 Yokohama World Time Attack Challenge.

STUNTING FOR The Kids

Matt Mingay is a legend of Aussie motorsport, having thrown cars and bikes around with glee for years as the ringmaster of the Hot Wheels Stunt Team. However for the 2024 Yokohama World Time Attack Challenge he's adding to the crew.

You'll still see the high-flying Super Truck hitting ramps at bulk speed; the Hot Wheels HSV GTSR pumping sick drifts; the Mazda rotary ute doing precision driving... but on top of that there is a Hot Wheels Activation and Kids Fun Zone in the pits, to encourage a new generation of petrolheads. Designed to draw out kids' creativity, their wild imagination, and their playfulness, the Kids Fun Zone will have something for children of all ages.

FAT CAT'S Back

All the way from Finland, Sami Sivonen has returned with the crowd favourite Audi R8 1:1. Boasting an incredible aero and power package the heavyweight supercar turned the time attack concept on its ear back in 2017, and Sami has once again shipped the spicy Audi Down Under to run in Plazmaman Pro-Am.

He's recently posted videos of the turbocharged Fat Cat making over 1000kW on just 20psi boost, signalling there is going to be some big speeds down the front straight.

MEGA-POWER MONSTERS

In a first for Yokohama World Time Attack Challenge, we are welcoming a team from South Korea to the competition. Team Neotech, supported by Aussie companies Shockworks and Haltech, will be racing in the Haltech Clubsprint class.

Driving for team Neotech will be Miji Kang, a South Korean influencer and international drifter. She has competed in the Thailand D1GP Lights and Indonesian Drift Series, as well as working as a driving instructor for Hyundai, Kia, Audi, and Maserati in South Korea.

While she cut her teeth in a Hyundai Genesis coupe, Miji will pilot a K24-swapped EG Civic at WTAC. Prepared by Melbourne suspension experts Shockworks the Civic is sure to be a rapid package around Sydney Motorsport Park!

GRUDGE Match

In years past the Turbosmart Flying 500 has seen some of Australia's fastest street/strip cars throw it all on the line to prove who is the fastest over the standing 500m. For the 2024 Yokohama World Time Attack Challenge is changing up the high-speed formula to create the Turbosmart Flying 500: Head to Head!

Two cars will face off in a race up the main straight of Sydney Motorsport Park, harking back to the earliest days of drag racing. There is no traction compound at play so you're sure to see some wild driving as we have some seriously powerful cars ready to throw down.

The 2024 Garrett International Drift Cup will see one of the largest fields of mega-powered slide-winding machinery we've ever hosted compete for the win. Among a stack of awesome drift cars, there are three cars with over 1000hp ready to throw down.

0

From NZ, Jaron Olivecrona's Parts Trader Lexus RC-F screams with a twin-turbocharged V12, but this is no Ferrari, Mercedes or Jaguar donk. It is one of the beautiful monsters from New Zealand engineering legends at Hartley Engines, based on a Toyota 1GZ-FE five-litre out of the Century limousine.

Daigo Saito's JZX100 Toyota Chaser features a methanolburning 3.5-litre 2JZ that produces a claimed 1000hp, and it is sure to be a weapon in his hands given it tips the scales at only 1000kg. Another 1000hp beast is Masashi Yokoi's MCR Factory S14 Silvia from Japan, which will debut at WTAC and boasts a 3.4-litre 2JZ.

OVER The top

Are you ready to see some of the wildest machinery we can put in one postcode hit the track together just to blow your mind? Want to see a McLaren GT3 go door-to-door with a rotary-powered VL Commodore and an S13 Silvia packing a supercharged V8 straight out of Summernats?

The Full Send Crew aims to put a bunch of utterly crazy cars together on the track, and let them go bananas. The crew also features a NASCAR-powered VK Group C big banger, an R35 VR38TT-powered 240Z Datsun, a body-swapped Nissan Patrol/370Z hybrid, a K24-powered Sprinter, and a twin-turbo Viper V10-powered R35 GT-R.

These guys and gals are regarded as some of the most spectacular in the biz when it comes to drifting so make sure you're trackside when these guys run their sessions.
